SOLUTION GUIDE

After-hours security

Know the moment a door opens after close.

Used in: Retail · Hospitality · Property management

THE PROBLEM TODAY

Stores, bars, back doors and vacant units go unchecked after close. A door left open or a break-in is found at opening — and losses only show up at the next stock count.

WITH SUBNETIK MONITORING

Door, motion and intrusion alerts out of hours, sent to the right person straight away — with a log of every access and no cameras needed.

3 WHERE TO FIT IT

   Sensor on the frame, magnet on the door.
2. **Motion sensors covering stockrooms and bars**
   Armed out of hours on a schedule.
3. **On cabinets and cash or key stores**
   Tamper alerts if a sensor is removed.
